

# TECHNOLOGIES

## **Kevlar Soft Feel Technology [KSF Tech]**

The Stick lay-up is compelted with a perfectly fitted film of ultra smooth Kevlar - used to absorb vibration and increase feel and control

## **Dual Aramid Technology [DA Tech]**

Double Kevlar reinforcement to maximise the impact diffusion for a smoother feel

## **Responsive Resine Technology [RR Tech]**

This Resin maximise the strength in the stick laminate for a super responsive feel.

## **Carbon Weave Laminate [CW Laminate]**

The CW Laminate provide extra strength with a light feel and high balance point for sharper skills

## **Feather Weight [FW]**

Using Premium high strength and lightweight materials in a dual core chamber system to give a high power to weight ratio performance with light feel guaranteed

## **Carbon Computation [CC]**

CC is an indicative amount of composite fibres used to achieve the sticks stiffness. The higher the CARBON COMPUTATION the stiffer the stick.

# VOODOO LIMITLESS KON

VOODOO Limitless has been designed and constructed for true performance under pressure. Don't be fooled by the weight, the Supa Lite Core delivers the lightest and most responsive stick on the market for the high quality skills and lethal hitting power.

The Limitless is a combination of Supa Lite Core, Responsive Resin Tech, Carbon Weave Laminate and Dual Kevlar Technology. With the combination of the Dual Kevlar technology it maximises the impact diffusion for a smoother feel on the ball. The Supa Lite Core reduces the overall weight and allows for high speed stick movements whilst the CW Laminate increases the overall strength of the stick to deliver the highest power.

# VOODOO NEMESIS

Introducing the VOOODO Nemesis, a little more playful with the VOOODO responsiveness trademark. The Nemesis was crafted using Supalite Core Technology that utilizes a twin channel construction, custom lay-ups, and ideal balance points to create a light and responsive stick.

It packs a punch with the perfect balance of power and soft touch that ensures superior ball control for execution of skills at dangerous speeds. A great stick to get your hands on if you want to have more control of your game.

The NEMESIS was specifically designed to bring control in your game. An ode to crafty skills with the VOOODO responsive touch.

The Nemesis is the perfect stick players looking to gain back control of the game and focus in on their basic skills. The high balance point allows you to be in full control of your sticks movements while the CW Laminates and the RR technology offer the necessary strength to any advanced players requiring high power.

# W000000 OMEGA

The Omega if your green card into the ELITE range of sticks. Built to be lighter, stronger, and more affordable than most of the sticks on the market without hurting your wallet. It has a lighter head than the rest of the elite range which transfers to quicker head speed and sharper skills under pressure.

The Omega has been designed to embrace the modern playing style and continues to #DefyConvention. The high balance point achieved with this elite construction allows quicker head speed and sharper skills under pressure.

Junior Profile VXJR

# WOODBROOK SPARK

JUNIOR

# WOODCOO JOURNEY

The main stick compartment allows for multiple sticks to be stored (because you can never have too many hockey sticks). The top bucket compartment makes for handy storage of keys, phone, wallet, mouthguard/any smaller items you want stored away during games and trainings whilst the two main front compartments are perfect for lugging all your game day gear to and from the pitch.

Our latest feature to the Journey Stickbag is the mesh pocket overlay on both main compartments that allow for you to slip anything in between for quick and easy access and the side mesh water bottle holder. The padded back and shoulder straps offer a comfortable carry no matter how heavy your gear inside is, and the padding utilises a mesh material that allows more ventilation and keeps your back from getting too hot and sweaty.

The Licorice colour was designed using water resistant tarpaulin material whilst the other colours have been designed with durable lightweight 600D polyester material.

# WOODDOO VOYAGER

The VOYAGER E5 was modelled off the JOURNEY E5 but with a slimmer profile however it still offers you space for everything you need to transport. It has an easy-to-carry backpack design with padded straps and back padding for comfortable carrying.

The Licorice colour was designed using water resistant tarpaulin material whilst the other colours have been designed with durable lightweight 600D polyester material.

# VOODOO TOTE

Pack your off pitch kit in to your totepack and cruise around the fields with the VODOOO totepack over your shoulder. The main compartment is fully zippable to make sure no gear falls out or gets wet from rogue sprinklers. There is also a small zipper pocket at the front perfect for storing your phone, keys or wallet.

Designed with water resistant tarpaulin materials with a sleek finish

# WOODCOO DUFFLE

The volume has also been increased within the Duffle E5 to allow for more room to store additional items to transport you to and from the pitch with no worries.

Designed with water resistant tarpaulin materials with a sleek finish, this will be the hottest addition to your field hockey range this year. Available in Licorice

# WOODCOO CRUISER

Protected Hidden Laptop Sleeve.  
External Stick Holding Harness.  
Re-Sizable Front Pocket.  
6 Storage Zones.  
Front Pocket.  
Mini-office 15 inch Laptop Padded Sleeve.  
Expandable Main Compartment.

# WOODBOO LIMITLESS GLOVE

Constructed with the same core design as this glove offers great protection of the hand and fingers while offering a grippy palm to prevent any slippages on the handle of your stick. Able to just slip straight on with no strap it is quick and easy to use while also being lightweight and durable.

# WOODBOO LIMITLESS SHINGUARD

Lightweight yet protective during the big hits Profiled shape with heat moulding, Air vents
